

ABOUT THE STATE

HAPPENINGS OF INTEREST FROM DIFFERENT SECTIONS

H. H. Kibbey, who has been principal of the North Bennington high school since 1909, has resigned.

D. F. Williams of Brookside has been granted a patent on an ensilage cutter, which he has assigned to the Ruggles Machine Co.

Miss Catherine H. Poole of Old Bennington, aged 81 years, died last Sunday in the same house in which she was born and where she had always lived.

Miss Jessie J. Smith of Fairfax became the first bride in that section of the state when she was united in marriage to Arthur W. Fawcett of Co. G on Monday morning.

Mr. and Mrs. Louis Limoges of Burlington observed their golden wedding anniversary at their home Saturday evening. Four generations of the family were present.

J. A. Lafam returned to Bennington Sunday from Manchester with the record catch of the season. He secured a brown trout from the Battellkill that measured 28 inches and weighed seven and one-quarter pounds.

As the result of a street recruiting campaign in Brattleboro Saturday night, 18 young men from that place volunteered to serve with the militia and left to join the rest of the Brattleboro company Monday morning.

A committee of three was appointed at a recent meeting in Rutland of the State Forestry association, which will investigate the tax legislation applying to timber land in this state to see if some law cannot be made which will be less of a burden to lumbermen.

Albert E. Center of Bennington, while riding a motorcycle on the road to Arlington recently, was violently thrown to the ground when the rear wheel of the machine collapsed. He was rendered unconscious for a time and is still confined to the house.

The soldiers and sailors of the Spanish-American war are to participate in the preparedness parade to be held in Rutland on July 4. Those from other parts of the state than the immediate vicinity of Rutland will be the guests of the Rutland "Comrades."

John Fleury, the Burlington canal boat captain who was reported drowned recently at New York, has returned to Burlington very much alive. Preparations were being made by his relatives for the burial of the body at Isle La Motte. It seems to have been a case of mistaken identity.

George, three-year-old son of Mr. and Mrs. Robert Goyette of Rutland, swallowed a quantity of carbolic acid Saturday, taking it from a shelf while left alone in a room. The solution was used as a disinfectant and was not very strong, but the baby was badly burned about the mouth and internally.

Three Burlington youths, while on a fishing trip near Northfield last week, narrowly escaped death when their car, which was proceeding along a narrow strip of road, slipped over the edge of the bank and turned turtle, pinning two of them, Charles Worthen and Arthur Stevens, beneath it. Worthen had two ribs broken and Stevens was severely cut about the legs. The other occupant, James B. Rivers, was thrown out and uninjured.

The Sulphuric Acid Industry Prosperous in 1915.

The production of sulphuric acid in the United States in 1915 was 3,868,162 short tons, expressed in terms of 50 degree acid, valued at \$29,600,000. In 1914 the output of 189,795 short tons of oleum or fuming acid of different strengths, valued at \$2,787,971, making a total of 4,057,957 short tons, valued at \$32,387,971.

These figures, which are made public by the United States Geological survey, and which were compiled by W. C. Phalen, include so-called by-product acid, or acid produced at copper and zinc smelters. The production of acid from this source in 1915 was 1,018,800 short tons, expressed in terms of 50 degree acid, valued at \$7,042,126, and included also 59,159 short tons of oleum of different strengths, valued at \$579,115.

The total production is an increase as compared with 1914, due to an increase in the production of acid of the stronger grades—60 degree and higher. The output of by-product acid in 1915 also showed an increase as compared with 1914. Expressed in value of products these increases have been large. In preceding years the survey has reduced the different strengths of acid, including the stronger grades, to 50 degree Baume, whenever sufficient data were available for this conversion. The manufacture of this stronger acid is becoming more important, owing to the demand from the explosives and war munitions industries, and in the statistics for 1915, for the first time, this acid is classified separately.

The price of sulphuric acid varied widely during 1915. Producers who had previously entered into long time contracts sold acid at prices much below those now current, especially during the last part of the year. The trade in strong acids was active, on account of the demand from the explosives and war munitions industries, but this demand came only after the first quarter of the year and was very strong only during the last half of the year. Before that time some acid plants were shut down. Average values are therefore much below those which ruled on the market at the close of the year.

"The Power of Silence."

The power of silence to achieve received a remarkable demonstration at Chicago last week in the nomination by the Republican national convention for the presidency of a man who refused to say a single word in his own behalf. The nomination of Mr. Hughes came as the result of a general popular demand which could not be drowned by the speech of those who sought the nomination.

The power of silence to achieve was exercised at St. Louis to-day when the Democratic national convention was called to order by the chairman of the national committee, Hon. William F. McCombs, who made a speech without mentioning the name of President Wilson or his administration. The unanimity with which he ascribes to the Democratic party all the credit for what he is pleased to regard as its "great achievements" during the last four years is deliberate and significant. If the omission throughout the speech of the name of the titular head of the party escaped the notice of the convention, it will not fail to command the attention and excite the curiosity of the country. The speaker was the generalissimo of the Wilson forces in the Baltimore convention, and in recognition of his arduous labor in behalf of Mr. Wilson's nomination was made chairman of the national committee. As far as his health would permit he bore the brunt of the management of the campaign.

Whether it was his volitional service preceding the convention, his successful generalship in the convention or the recklessness with which he risked his health in the campaign that followed, or the combination, that disqualified him in the mind of President Wilson for any association with the administration, we hesitate to venture an opinion. Colonel George Harvey or "Marine" Henry Waterson may be able to throw some light upon the cause of that detachment from official relationship which Mr. Wilson has so frequently appeared to regard as a suitable reward of disinterested political effort of which he has been the beneficiary. Until those authorities can be heard from, however, there is a line in Mr. McCombs' St. Louis speech which possesses a pertinent ring: "Ambition is a noble attribute, but when it is adulterated with greed, a cataclysm is inevitable." The suppression or omission of the name of the president from the opening speech of the convention assembled to renounce him for re-election may

ANNOYING KIDNEY ILLS

Make Life Miserable for Many Barre People

There's nothing more annoying than kidney weakness or inability to properly control the kidney secretions. Night and day alike, the sufferer is tormented, and what with the burning and scalding, the attendant backache, headache and dizziness, life is, indeed, a burden. Doan's Kidney Pills have given peace and comfort to many Barre people. Profit by this Barre resident's experience.

Frank E. Adams, 47 Elm street, Barre, says: "I have used Doan's Kidney Pills, and they have proved a valuable medicine. For some time I had been troubled by my kidneys. My back ached, and I had pains in my sides, but Doan's Kidney Pills cured the trouble."

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional treatment. Deafness is caused by an inflammation of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a running sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; else cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surface. We will give one Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circular, free. F. J. CHENEY & CO., Toledo, O.
